

Ahmed Lukman

Motivated young professional with a dream of changing the world through creativity and technology. I am keen to pursue a career within the ICT industry and a passion to progress in ideation and design of innovative products to make people's lives easy.

I have been active in a number of activities and I have a proven aptitude for computer science with proven ability in researching and developing new products that are innovative and designed to meet the needs of both end users and the environment.

I am strong in coding using various programming languages and I have also made a number of notable achievements in both my studies and extra-curricular activities which would make me an excellent asset to any organisation.

High School Activities
